W O R K E X P E R I E N C E

Sr Cybersecurity Engineer / PayPal, Austin, Texas

09/2024– Present

Driver for the Cryptography 2026 OKRs | Cloud Modernization - Cryptography | Tech Lead

- ◊ Drove weekly organization-wide multi-team design forums for the Cryptography solutions of the PayPal-wide GCP migration, aligning with senior technical leaders to design and architect complex enterprise-wide solutions, then proceed with implementation, testing, presentation, and delivery.
- ◊ Architected and Implemented the Enterprise-wide class 2 (PII) data encryption solution, the “CryptoSDK” (Utilizing GCP Tink and Caffeine caching), performed extensive load testing of 100k envelopes (~0.1ms), and presented the solution to a forum of 50+ managers, directors, SVPs, and distinguished engineers.
- ◊ Architected, Implemented, end-to-end tested, and deployed the data interoperability solution to facilitate the interoperability of class 2 encrypted data between cloud and on-premise systems via a service that in-memory decrypts the on-premise encrypted payload and re-encrypts with the CryptoSDK.
- ◊ Architected, Implemented and end-to-end tested the Schema driven Key Provisioning Service, a GCP Cloud Run service that provisions new HSM-backed GCP KMS encryption keys and symmetric Data Encryption Keys. This fits into a bigger picture architecture of per-table, per-PII-field encryption keys.

Cybersecurity Engineer on the Secret Management team

- ◊ Saved the company \$800K annually by driving the Fortanix HSM → GCP CMEK migration to completion across 22K+ disks and 400+ teams.
- ◊ Released the latest major version upgrade of our 5 encryption and key management (Internal Java Framework) client libraries, including fixing 100+ of broken legacy functional tests, builds, and some pipeline jobs.
- ◊ L1, rotational on-call critical incident support on PayPal’s legacy key management system, and its class 2 encryption systems as well as swiftly addressing live issues requiring immediate analysis, team coordination, development, and emergency release.
- ◊ L2 developer support, assisting developers with integrating with our legacy KMS

Driver for the Key Management System Modernization 2025 OKRs | HashiCorp Vault Migration

- ◊ Drove weekly design forums for the legacy KMS → HashiCorp Vault migration, aligning with senior technical leaders to solve complex issues such as enterprise-wide key sharing and key drift, and translating outcomes into actionable deliverables
- ◊ Directed another team in a different organization to develop the KMS self-service platform, Vault Console
- ◊ Interviewed contractors, onboarded, assisted, oversaw, reviewed, and delivered their feature development in our legacy KMS to unblock migrations
- ◊ Built automation and tooling to register applications with Vault and support migrations, including Terraform PR pipelines and idempotent KV migration scripts
- ◊ Laid the groundwork for enterprise-scale Vault migration across 700+ applications and VMs by creating onboarding playbooks, hosting developer working sessions, and building a status board to track readiness across all required pieces.

Software Engineer / Dell Technologies, Round Rock, Texas

08/2023 – 09/2024

Backend Software Engineer on the Customer Integration Layer Microservices team | Part of the ITDP (IT Development Program, a rotational program for new grads)

- ◊ Remediated 100+ vulnerabilities across all my teams’ repositories. Reduced total vulnerabilities reported locally to 0%
- ◊ Increased total code coverage of the Customer Integration Layer Microservices team’s main repository from 66% to 90% by writing 100+ unit tests
- ◊ Implemented multiple new DevOps jobs to our CI/CD pipeline with capabilities such as vulnerability detection and SAST scans
- ◊ Implemented required feature updates to our CRUD endpoints within our microservices
- ◊ Enhanced the performance, security, and maintainability of my team’s repositories by upgrading from .NET 6 to .NET 8

Full-Stack Software Engineer for the Customer Primary Data team | Part of Dell Digital’s Customer Innovation Council

- ◊ Implemented the CI/CD pipeline for the teams AI application

Member of the Dell Digital NA CIO Regional Council – Career Pillar | This council plans career-oriented events in North America for the Dell Digital organization

- ◊ Assisted in the planning of events such as “Pancakes with leaders” and the “2nd Annual Live Cooking Show”

Software Engineer / Texas A&M University Corpus Christi Lone Star UAS, Corpus Christi, Texas

10/2021 – 05/2023

Full-Stack Software Engineer (Intern/Co-Op) | This was a co-op position that I worked alongside attending University for >1.5 years

- ◊ Built a .NET MAUI background mobile app that streams employee location via MQTT to a situational-awareness platform; one-tap enable/disable.
- ◊ Shipped a UAS live-status dashboard (battery%, speed, altitude) with per-aircraft/global thresholding, persisted settings, and real-time alerting.
- ◊ Developed multi-threaded MQTT/ActiveMQ tooling (traffic logger + replay) and a Node.js simulator service that generates configurable event streams.
- ◊ Created a new ASP.NET Core MVC web application with Authentication / Authorization / Impersonation capabilities using Microsoft Identity and Entity Framework.
- ◊ Implemented new CRUD operations for new tables in our database with stored procedures, new endpoints in our API, and controls and visuals in our web UI.

Owner / Carver Tech LLC

02/2022 – Present

- ◊ Created a Review management SaaS with a dashboard that tracks every review for companies 1-n from their chosen source(s) (TripAdvisor, Facebook, Yelp and Google) and allows the user to generate a custom, AI-generated response, for each review. Video explanation can be found [here](#).

E D U C A T I O N

Bachelor of Science, Computer Science, Concentration: Systems Programming, Accreditation: ABET / Spring 2023 – Graduated

Texas A&M University Corpus Christi, Corpus Christi, Texas

Associate of Science, Computer Programming / Spring 2021 – Graduated

Del Mar College, Corpus Christi, Texas

- ◊ Founding President of the Del Mar College Computer Science Club
- ◊ Inducted into the Del Mar College Hall of Fame in Spring of 2021
